SINCE 1928

GUANGZHOU TIGER HEAD BATTERY GROUP CO.,LTD.

INTRODUCTION

Guangzhou Tiger Head Battery Group Co., Ltd

Guangzhou Tiger Head Battery Group Co., Ltd., with authorized self-import & export right, is the key enterprises for dry batteries in China. It realizes the annual sales over 6 billion pieces of dry batteries, and export value over 420 million U.S. dollars, which makes it the leading battery enterprise in China, not only in the concern of sales volume and export volume, but also of export value and main business incomes.

The company's main products involve all kinds of dry batteries, lead-acid storage batteries, Ni-MH batteries, polymer Li-Ion batteries, inverters, branded by "555", "Tiger Head", "TIHAD", and "Lighting", and some battery-related small household appliances, such as jump starters, energy saving bulbs, LED lights, candles, mosquito coils, footballs, and so on. In 2010, the company developed a new generation of low-carbon product named Lighting Battery which acts as lighting without affecting the normal function for power supply, facilitating emergency, adventure, atmosphere, and maintenance, etc.. In 2012, the Art Battery was presented not only with basic function of normal battery, but also with function of art ornament and emergency.

For years, the company is cared and supported by leaders at all levels. The party and state leaders as well as provincial and municipal leaders, such as Wen Jiabao, Li Changchun, Wu Yi, Zhang Dejiang, Zou Jiahua, Huang Huahua, Zhu Xiaodan, Zhang Guangning etc., have paid visits to the company, bringing great incentive. On December 11, 2002, Zou Jiahua, vice chairman of National People's Congress, inspected the company with the inscription of "Clean Production Model and Modern Environmental Pioneer" while on October 15, 2006, Premier Wen Jiabao visited the company and praised by words of "let old brand glow with youth by integrating production with trade, by brand

strategy and technological innovation". On Sep.22, 2011, Mr.Zhang Dejiang, Vice premier of China, visited our company and affirmed our achievements. The trademark "Tiger Head" of the company is the first "Chinese Well-known Trademark" in Guangzhou as well as in the country's battery industry. At the same time, it is identified as "Chinese Export Brand". Besides, the trademark "555" is the "Famous Trademark" in Guangzhou city as well as in Guangdong province.

Based on strengthening quality control and seeking development via technical progress, Tiger Head Battery Group Co., Ltd. has been making persistent efforts to excel. As the first company using computer-controlled automatic discharging detection facility to fulfill strict quality monitoring in production, the company is marked as "excellent enterprise of light industrial in China" with advanced quality control system. It has passed the certification for ISO9001:2000 quality management system and ISO14001:2004 environment management system. For years running, it has been evaluated as the "Advanced Enterprise of Quality and Profit" by the Ministry of Foreign Trade and Economic Cooperation, PRC, the State Bureau of Light Industry and the Quality Control Association of Guangdong Province.

Recently, the company invested RMB 1.5 million independently developing the Real-time Monitoring Management System via IT new technology, which includes several parts of on-the-spot production management, operation instruction, and figures analysis, etc. This system, via visual image transformation and vivid industry control charts, can help monitoring persons to get accurate first-hand information about the production; even they are not on the production spot. Thus, it helps to improve management efficiency and reduce management cost.

SINCE 1928

PURE SINE WAVE INVERTER

TECHNOLOGY ADVANTAGE

Core Technology: CPU and PCB

Smart CPU

PCB Main Board

Function

- Short circuit protection
- Over temperature protection
- Overload protection

Structure

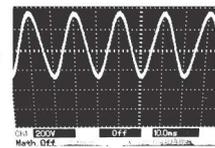

Inner structure : All the components are set up in order with scientific design.

Screen: With detailed working indicators, everything related is shown clearly.

Outstanding Performance

1. Adopt pure sine wave inverters, with smooth waves. With this advantage, the inverter can work stably.
2. The inverters are all controlled by protective critical values, keeping the inverters work efficiently in any possible situations.
3. The switching time is less than 0.4ms.
4. High-quality materials and long-life components are contained in our inverters.

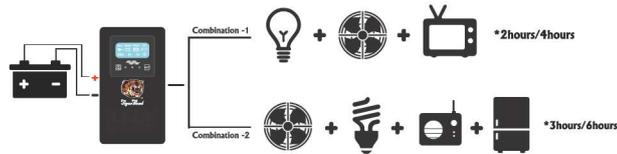

ADVANTAGE

Difference	Inverters of Our Brand	Inverters of Other Brands
Reaction Ability of Protection Function	The critical point for the protection of each protection function is set in strict accordance with the requirements of implementation. We also made adjustment on the hardware to keep consistent with the software's reaction speed, which effectively solves the protection allergic phenomenon.	Protection of inverters is too sensitive, prone to crashes, restart, flash and other unstable factors, which caused adverse effects to customer's usage.
Margin Magnification Standard	Our inverters equip with 6 times margin, coupled with slow start-up technology, which solves the problem of inductive load with strong impact well.	Adopt 3 times margin
Standard of Main Components	We only manufacture inverters of high quality of every component to ensure long-life use.	Common standard.
Protection	Short circuit protection(Without self-restart)	Short circuit protection(self-restart after 5 seconds), which is easy to damage electrical appliances
Time of Exchanging to Electric Power Supply	3-5 seconds	Longer than 22 seconds
Power Loss Without Load	11W	More than 18W

DC SERIES DC 12V500VA

INTRODUCTION

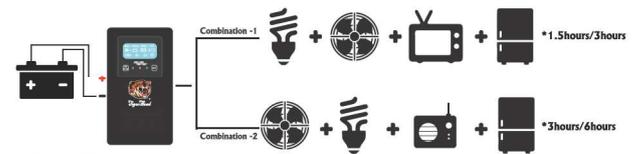

12V 100Ah/200Ah x 1 PC

DC 12V500VA	
Model	DC 12V500VA
POWER	500VA
Charging Current	15 - 20A
DC Voltage Input	12V
Inverter Output Voltage	110V/230V±3%
Output Waveform	Pure sine wave
Transfer Time	Automatic switching within 4ms
Overload Capacity	120%for 10min,150%for 1min
Protection Function	Short circuit protection, overload protection, over temperature protection, battery protection against reverse connection(reverse connection protection)

Electrical Appliances	Collocation of Inverter and Battery

SOLAR SERIES SDC 24V2KVA

INTRODUCTION

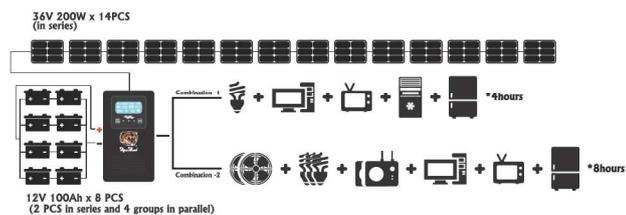

SDC 24V2KVA	
Model	SDC 12V1.8KVA
POWER	2000VA
Charging Current	15-30A
DC Voltage Input	24V
Inverter Output Voltage	110V/230V±3%
Output Waveform	Pure sine wave
Transfer Time	Automatic switching within 4ms
Overload Capacity	120%for 10min,150%for 1min
Protection Function	Short circuit protection, overload protection, over temperature protection,battery protection against reverse connection(reverse connection protection)

Electrical Appliances	Collocation of Inverter and Battery							
	SDC 24V2KVA Inverter + 12V 200Ah x 4 PCS Battery (2 PCS in series and 2 groups in parallel)				DC 24V2KVA Inverter + 12V 200Ah x 8 PCS Battery (2 PCS in series and 4 groups in parallel)			
	Battery Fully Charging Time	8h for 1PC		Battery Fully Charging Time	8h for 1PC		Group 2	Time
		Solar panel	36V 200W x 14PCS(in series)		Solar panel	36V 200W x 28PCS(in series)		
Incandescent Bulb	100h				200h			
CFL Light Bulbs	240h	✓✓		✓✓✓	480h	✓✓	✓✓✓	
Fan	320h	✓✓		✓✓✓	640h	✓✓	✓✓✓	
Radio	480h	✓✓		✓✓✓	960h	✓✓	✓✓✓	
Air Conditioner(1HP)	6h	✓	4h	8h	12h	✓	8h	
TV	24h	✓		✓	48h	✓	✓	
Computer	24h	x		✓	48h	✓	✓	
Fridge	32h	✓		✓	64h	✓	✓	

SOLAR SERIES SDC 24V2.5KVA

INTRODUCTION

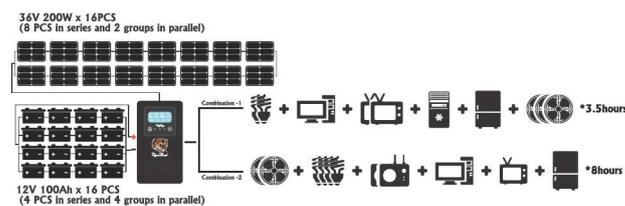

SDC 24V2.5KVA	
Model	SDC 24V2.5 KVA
POWER	2500VA
Charging Current	15-30A
DC Voltage Input	24V
Inverter Output Voltage	110V/230V±3%
Output Waveform	Pure sine wave
Transfer Time	Automatic switching within 4ms
Overload Capacity	120%for 10min,150%for 1min
Protection Function	Short circuit protection, overload protection, over temperature protection, battery protection against reverse connection(reverse connection protection)

Electrical Appliances	Collocation of Inverter and Battery											
	SDC 24V2.5KVA Inverter + 12V 200Ah x 4 PCS Battery (2 PCS in series and 2 groups in parallel)					DC 24V2.5KVA Inverter + 12V 200Ah x 8 PCS Battery (2 PCS in series and 4 groups in parallel)						
	Battery Fully Charging Time		8h for 1PC				Battery Fully Charging Time		8h for 1PC

SOLAR SERIES SDC 48V3.5KVA

INTRODUCTION

SDC 48V3.5KVA	
Model	SDC 48V3.5 KVA
POWER	3500VA
Charging Current	15-30A
DC Voltage Input	48V
Inverter Output Voltage	220V±3%
Output Waveform	Pure sine wave
Transfer Time	Automatic switching within 4ms
Overload Capacity	120%for 10min,150%for 1min
Protection Function	Short circuit protection, overload protection, over temperature protection, battery protection against reverse connection(reverse connection protection)

Electrical Appliances	Collocation of Inverter and Battery							
	SDC 48V3.5KVA Inverter + 12V 200Ah x 16 PCS Battery (4 PCS in series and 4 groups in parallel)							
	Solar panel		36V 200W x 16PCS (8 PCS in series and 2 groups in parallel)					
	Battery Fully Charging Time		7h for 1PC					
Time of Use Alone		Group 1		Group 2		Time of Use Alone		
Item		Time		Item		Time		
Incandescent Bulb	400h							
CFL Light Bulbs	960h		✓✓		✓✓✓✓			
Fan	1280h		✓✓✓		✓✓
